

# **EXHIBIT 4**

# Baicells PLMN Migration Plan

CONNECT MORE WITH LESS

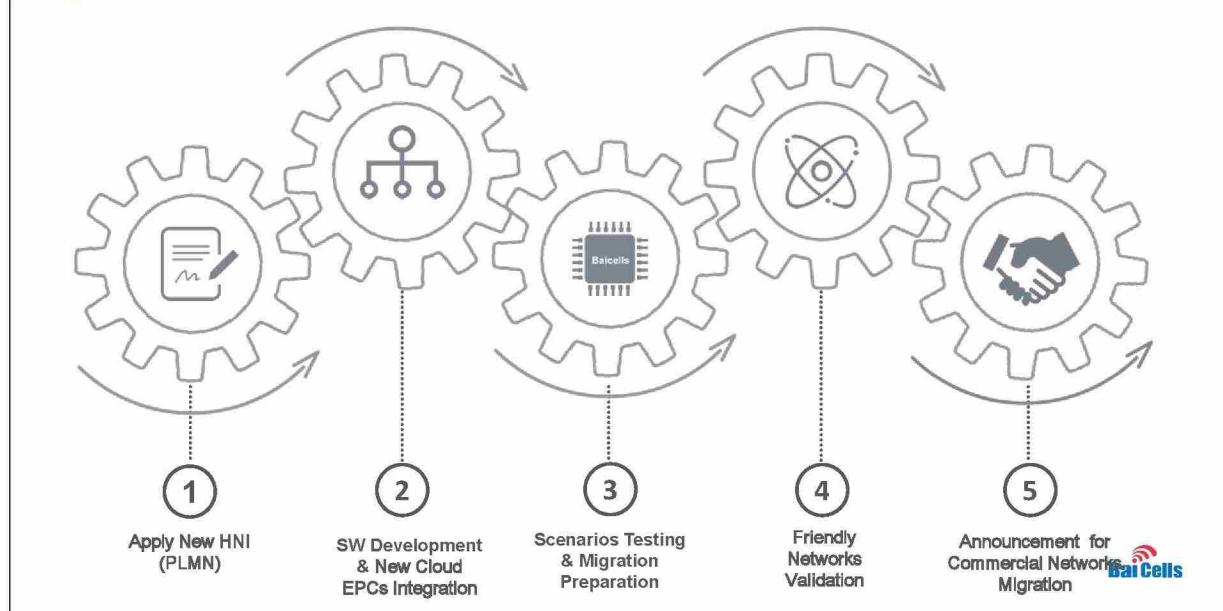

## Background

- PLMN “311-98” historically used in Baicells Cloud EPC appears to be unregistered in ITU
- To help overcome confusion, Baicells applied for and has received a new HNI/PLMN (314-030)
- Multiple scenarios need to be tested prior the new PLMN migration
- Commercial networks step-by-step migration is expected to take 6~9 months to ensure network safety
